

5th International Conference on Electronic Voting
July 12–14 • Bregenz • Austria

EVOTE 2012

**CALL FOR
PAPERS**

This conference is the international meeting point for e-voting experts from all over the world to hold an interdisciplinary and open discussion of all issues electronic voting involves. In 2004, 2006, 2008 and 2010 more than 330 experts from 26 countries discussed electronic voting. EVOTE 2012 is co-organized by the Gesellschaft für Informatik and the Council of Europe.

The aim of this conference is to bring together e-voting specialists working in academia, politics, government and industry in order to

- ❖ Discuss all forms of electronic voting (including but not limited to polling station, kiosk or remote voting by electronic means)
- ❖ Formulate the interdisciplinary issues involved (technology, law, politics and society) in designing and implementing e-voting.
- ❖ Present new ways of solving the voting paradigm of unequivocal identification of the voter and full anonymity of the vote as well as vote verifiability and voting system certification.
- ❖ Report on implementations, their legal, organizational and technical framework, the project experience made, and future plans.
- ❖ Analyze the interrelationship with and the effects of e-voting on, democratic institutions and processes as well as voter behavior.
- ❖ Conduct a social and political analysis of the effects of electronic voting.
- ❖ Discuss security requirements and testing in accordance to international security standards i.e. Common Criteria or ITSEC.

The idea of this conference is to discuss the development in this field in a 3-day conference that deals with the topics from a theoretical view as well as practical case studies.
